

BKT

GROWING TOGETHER

AGRICULTURE

AGRICULTURAL PRODUCT RANGE BOOKLET

No matter how challenging your needs, BKT is always with you, offering a wide range of tires tailored to every need in agriculture: from work in the open field to the orchards and vineyards, from high power tractors to trailers for transport. Reliable and safe, sturdy and durable, capable of combining traction and reduced soil compaction, comfort and high performance.

AGRICULTURAL PRODUCT RANGE

BOOKLET

Soil-improving technology

IF/VF solutions widen your tire's contact area on the ground reducing soil compaction. This technology results in enhanced traction, less slippage, increased soil productivity, and reduced fuel consumption leading to overall increased yields.

IF AND VF TIRES FEATURE **MAJOR SIDEWALL FLEXIBILITY** COMPARED TO STANDARD RADIAL TIRES.

Improved Flexion Tire

+20%
LOAD

Very High Flexion Tire

+40%
LOAD

at equal inflation pressure, same conditions.

Reduced soil compaction

Thanks to the optimized contact area on the ground, a wider profile, and thanks to reduced inflation pressure, IF and VF tires significantly minimize soil compaction, which is the reason for 20% of harvest losses. As a result, the yield per hectare increases preserving both the soil's integrity and properties.

Less operating costs

Designed for ensuring an extended product life-cycle and an optimum return on investment, **both IF and VF tires have been built for a by-at-least-10%- increased durability compared to their standard equivalent.** Even under operating conditions at low pressure, these tires show off their strength and resistance over the time as well as for road usage.

Optimized operating hours

IF and VF tires' tread design enhances road efficiency by reducing transport cycles and maximizing field operations thanks to excellent traction that increases the yield per hectare. In addition, without any need for changing inflation pressure, IF and VF tires provide actual time savings.

More load capacity

Against the backdrop of always heavier machinery and loads and a consequently increased risk of soil compaction and crop damages, tires play an essential role. **Both IF and VF tires perfectly meet the need of maximizing load capacity without modifying inflation pressure regardless of speed.**

Maximum performance

IF and VF tires have been designed and built with a strong and likewise flexible casing to withstand any kind of stress even under the most severe operating conditions. Ensuring a safe, stable and effortless drive is indeed a challenge that BKT faces every day at their Research and Development Center.

Ensured comfort

IF and VF tires contribute to reduce operators' fatigue and to ensure them an enjoyable driving experience both in the fields and during road transfers by significantly reduced vibrations and noise. The special casing enables the tire to rapidly recover its correct shape even after long periods of inactivity.
